\*As Received data (sometimes called 'As Found' data) records performance of a logger when received at Mesa before any repairs take place. It is used to validate past processes and is required often in the medical industry and rarely in food. Whether you will need this extra data is determined by the governing bodies of your industry as well as your in-house operating procedures.

Ship Via:  Customer Shipping Account # (if applicable):

Return shipment via Mesa default courier unless specified here:

Please specify:
