

End of Service Notice

30-March-2017

Dear Mesa Customer:

Effective **3-April-2017**, Mesa Labs is discontinuing service for all stainless steel **Flexible Loggers** with a taper tip. Mesa Labs will continue to accept service requests for Flexible Loggers, but they will be replaced, as applicable, with the equivalent bendable taper tip version.

Custom length Flexible Loggers will be evaluated on a case-by-case basis to determine if the logger is significantly damaged and not suitable for reliable use. Should the logger be deemed damaged and beyond repair, a replacement fee will apply.

Additional information about Bendable Loggers is available at <https://datatrace.mesalabs.com>.

To obtain an RMA for calibration or service, please visit our website at <http://datatrace.mesalabs.com/calibration/>, contact Customer Service at (303) 987-8000, or send an email to customerservice@mesalabs.com.

Thank you.

The Mesa Labs Team
